

## CALIBRATING YOUR DEVICE

In order to complete a Vizual Edge Evaluation or Training session, you must first calibrate your device screen. Calibrating your device screen is necessary to ensure that the Edge Trainer tests are properly adjusted based on screen size. Once calibrated, you can easily select the device profile each time you begin an evaluation or training session.

1. After logging into your account to begin your evaluation, you will be prompted to calibrate your device profile before beginning the evaluation. Select [CREATE NEW PROFILE](#). If you have already created a device profile and need to edit it, skip to Step 4.

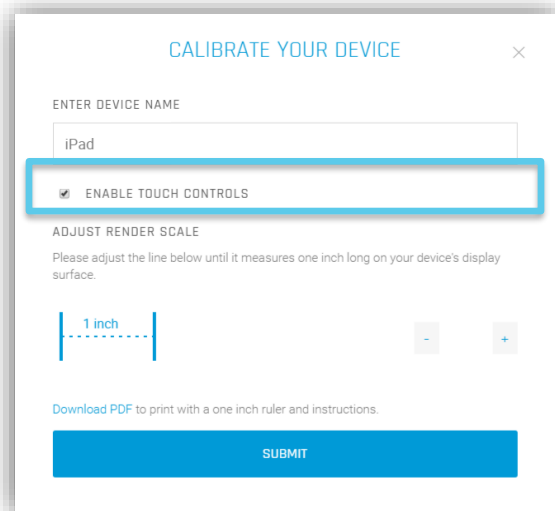

2. Enter your device name and adjust the 1-inch scale based on your screen size.

A screenshot of a web form titled 'CALIBRATE YOUR DEVICE' with a close button (X) in the top right corner. The form contains several sections: a text input field labeled 'ENTER DEVICE NAME' with the text 'Dell Laptop' entered; a checkbox labeled 'ENABLE TOUCH CONTROLS' which is currently unchecked; a section titled 'ADJUST RENDER SCALE' with the instruction 'Please adjust the line below until it measures one inch long on your device's display surface.'; a visual scale consisting of a horizontal line with vertical end caps, labeled '1 inch' in the center, and minus/plus buttons to its right for adjustment; a link that says 'Download PDF to print with a one inch ruler and instructions.'; and a large blue 'SUBMIT' button at the bottom.

NOTE: You can select [Download PDF](#) to print out a one-inch ruler and instructions if you do not have a ruler easily accessible to measure.

NOTE: If you have a touch screen laptop or tablet with no keyboard, please be sure to mark [ENABLE TOUCH CONTROLS](#)

CALIBRATE YOUR DEVICE

ENTER DEVICE NAME

iPad

☒ ENABLE TOUCH CONTROLS

ADJUST RENDER SCALE

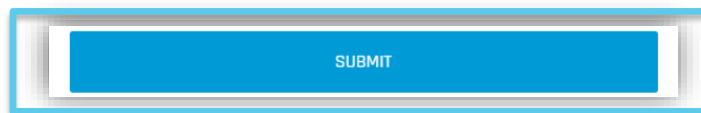

Please adjust the line below until it measures one inch long on your device's display surface.

1 inch

[Download PDF](#) to print with a one inch ruler and instructions.

SUBMIT

- After you have correctly measured one inch, click **SUBMIT** to save your device profile.

- To edit an existing device profile, click the **TRAINING** tab on the left, then select **CALIBRATE DEVICE** on the right side of the page.
